ABU DHABI FUND FOR DEVELOPMENT

TANZANIA

Abu Dhabi Fund for Development's Efforts to Support Sustainable Growth in

Tanzania

Abu Dhabi Fund for Development (ADFD) and the Government of Tanzania have enjoyed close ties for more than four decades. This strategic partnership aims to achieve sustainable development goals in vital economic sectors and, in turn, benefit the country's population.

Since 1977, ADFD has funded six development projects in Tanzania, spanning key socio-economic sectors and valued at AED 324 million.

FACTS AND FIGURES

LOANS AND GRANTS IN TANZANIA

Funding Type	Projects	Funding Value
Concessionary Loans	3	228
Government Grants	3	96
Total	6	324

(Value in AED Million)

SECTOR DISTRIBUTION OF PROJECTS

Sector	Projects	Value	Percentage
Water	1	18	6%
Transportation	2	224	69%
Industry	2	45	14%
Health	1	37	11%
Total	6	324	100%

(Value in AED Million)

All numbers are updated until January 2020

PROJECT OVERVIEW

KAGERA SUGAR FACTORY

VALUE
AED 41 million

YEAR FUNDED
1977, 2008

Accounting for 25% of Tanzania's GDP, industry is an important pillar of economic growth.

The sugar industry is considered one of the most lucrative sectors in the country, providing direct employment for about 30,000 people. Sugar production is concentrated in three main districts in Tanzania: Morogoro, Kagera and Kilimanjaro. To boost the utilisation of sugar cane – the country's rich natural resource – and enhance sugar production, ADFD financed the Kagera Sugar Factory project in two phases – 1977 and 2008.

The scope included the construction of a new sugar factory in Kagera with a total capacity of 105 tonnes per hour or approximately 2,500 tonnes per day, as well as the provision of advanced sugar production equipment. Furthermore, the funding covered the cleaning and repurposing of 14,500 hectares of land, with 12,460 hectares earmarked for planting sugar cane, and the remaining land allocated for buildings and roads.

ZANZIBAR RURAL WATER PROJECT

VALUE
AED 18 million

YEAR FUNDED
1993

Rural areas often suffer from scarce clean water supply and lack of proper infrastructure to provide access to water sources.

To ensure adequate water supply in Tanzania, ADFD financed a rural water project in Zanzibar that has provided a reliable source of drinking water for seven villages on two islands. In addition, it has improved the standard of living and the health of the local population.

Works included digging wells, building reservoirs and pumping stations to supply the villages with water, and providing consultancy services for the design and implementation of projects.

KIDAHWE-UVINZA ROAD

VALUE
AED 169 million

YEAR FUNDED
2009

Inaugurated in 2015, the strategic Kidahwe-Uvinza infrustructure project is part of the 604 km highway that connects the eastern and western regions of Tanzania.

The road serves as a vital link between Kidahwe, Uvinza and other cities located in between, and facilitates the movement of people and merchandise between Tanzania and neighbouring countries, including Burundi and Rwanda, boosting the overall economic activity.

The works comprised the construction of a 77 km single-lane road linking the Kidahwe area to Uvinza and Kigoma, in addition to several small bridges that enable the passage of water in the valleys.

UVINZA-ILUNDE-MALAGARASI ROAD

VALUE
AED 55 million

YEAR FUNDED
2018

In 2018, ADFD provided the financing to upgrade the Uvinza-Ilunde-Malagarasi Road, an extension of the Kidahwe-Uvinza Road.

Aimed at enhancing the socio-economic status of rural populations, especially in the Kigoma Region, the upgrade seeks to improve the transportation network between former capital Dar es Salaam and the lake port town of Kigoma. Set to boost domestic connectivity between villages and cities, as well as international connectivity with neighbouring countries, such as Burundi and the Democratic Republic of the Congo, the project supports Tanzania's strategic objective to become East Africa's industrial and logistics hub.

The scope involves the reconstruction and upgrade of a 51 km long, 6.5 m wide single-lane carriageway with 1.5 m wide internal and external shoulders that connects the towns of Uvinza and Ilunde with the town of Malagarasi. In addition, ADFD is providing consultancy services for the detailed design and supervision of the works that include the construction of small crossing bridges, culverts and service ducts.

WETE HOSPITAL

VALUE
AED 37 million

YEAR FUNDED
2019

In 2019, ADFD provided AED 37 million towards the development of Wete Hospital on Pemba Island in Zanzibar region of Tanzania.

The support aimed to develop the healthcare sector in Tanzania and improve the efficiency of treatment services for thousands of patients in the country.

ADFD financed the project as part of its support for the development programs carried out by Zanzibar government to achieve sustainable development in the region through advancing its healthcare sector and improving the quality of life of its residents. To be developed to the highest international healthcare standards, the hospital will be fitted with the latest medical equipment and devices.
